REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

None of the prior art made of record teaches or suggests a hollow member comprising a first panel attached to a second panel, the first panel comprising a nonwoven material, the second panel comprising an elastic nonwoven material, the first panel being connected to the second panel in a manner that forms a seam, the seam including a plurality of spaced apart microcuts. Also, none of the prior art made of record includes a cleaning device having a first hollow member having an open end for the insertion of a first finger, the hollow member defining a texturized surface, a second hollow member having an open end, at least the first hollow member or second hollow member containing an elastic nonwoven comprising an elastic component and a non-elastic component, further wherein the texturized surface comprises a point unbonded material, the point unbonded material comprising a plurality of raised tufts surrounded by bonded regions. In each of Cameron (USPN 2,966,691), Ness (USPN 2,041,262), McCarver et al. (USPN 5,362,306), and Adams, IV (USPN 3,696,821) there is no teaching or suggestion particularly of a texturized surface comprising a point unbonded material, the point unbonded material comprising a plurality of raised tufts surrounded by bonded regions and it would not be obvious to combine the structure of the abovementioned references to achieve this.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
